DETAILED ACTION

Response to Amendment

1. The cancellation of Claims 16-17, 19-23 in the submission dated 8/30/07 is acknowledged and accepted.

Oath/Declaration

2. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not identify the mailing address of each inventor. A mailing address is an address at which an inventor customarily receives his or her mail and may be either a home or business address. The mailing address should include the ZIP Code designation. The mailing address may be provided in an application data sheet or a supplemental oath or declaration. See 37 CFR 1.63(c) and 37 CFR 1.76. Specifically, a mailing address for inventor Scott W. Parks is missing from the oath or declaration.

3. Applicant is now required to submit a substitute declaration or oath to correct the deficiencies set forth in this Office Action. The substitute oath or declaration must be filed within the THREE MONTH shortened statutory period set for reply in the "Notice of Allowability" (PTO-37). Extensions of time may NOT be obtained under the provisions of 37 CFR 1.136. Failure to timely file the substitute declaration (or oath) will result in **ABANDONMENT** of the application. The transmittal letter accompanying the declaration (or oath) should indicate the date of the "Notice of Allowance" (PTOL-85) and the application number in the upper right hand corner.

Allowable Subject Matter

4. This application is in condition for allowance except for the presence of Claims 12-15, 24-33 directed to an invention non-elected without traverse. Accordingly, Claims 12-15, 24-33 have been cancelled.
5. Claims 1-11, 18 are allowed.

EXAMINER'S AMENDMENT

6. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel Claims 12-15, 24-33.

7. The following is an examiner's statement of reasons for allowance:

Claim 1 is allowable over the cited art of record for at least the reason that the cited art of record fails to teach or reasonably suggest a microscope stage assembly, as generally set forth in Claim 1, the assembly including, in combination with the features recited in Claim 1, a microscope stage drive mechanism having an end shaped to be detachably secured to the underside of said stage on the left or the right side of said stage; wherein said end of said drive mechanism is receivable into said first hole to detachably secure

Art Unit: 2872

said drive mechanism at said first location of said stage; and wherein said end of said drive mechanism is receivable into said second hole to detachably secure said drive mechanism at said second location of said stage. Claims 2-11 are dependent on Claim 1, and hence are allowable for at least the same reasons Claim 1 is allowable.

Claim 18 is allowable over the cited art of record for at least the reason that the cited art of record fails to teach or reasonably suggest an interchangeable microscope stage drive assembly, as generally set forth in Claim 18, the assembly including, in combination with the features recited in Claim 18, a hole on each of the left and the right sides of said stage; wherein said drive mechanism is detachably secured to said stage by inserting an end of said drive mechanism in one of said holes at said right or left side of said stage; and a spring-loaded ball bearing to detachably secure said stage drive mechanism to said stage.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

JP 2002-182122 A to Tomioka.

Tomioka is being cited to evidence a conventionally known microscope stage drive assembly (See for example 70, 71, 72, 73, 74 in Figures 1, 2, 4, 6), which may be attached and detached with respect to either the left and right side of the microscope stage (See Abstract). However, Tomioka, either singly or in combination with the cited art of record, fails to teach or reasonably suggest the limitations recited in Section 5 of this Office Action.
